Subject: Journal of Clinical Question - Decision on Manuscript ID JCQ-2024-0022

Body: 10-Feb-2025

Dear Dr Kawashima:

It is a pleasure to accept your manuscript entitled "The Efficiency and Safety of Adjuvant Middle Meningeal Artery Embolization in Non-acute Subdural Hematomas: A Systematic Review and Meta-analysis of Randomized Clinical Trials" in its current form for publication in the Journal of Clinical Question. The comments of the reviewer(s) who reviewed your manuscript are included at the foot of this letter.

Thank you for your fine contribution. On behalf of the Editors of the Journal of Clinical Question, we look forward to your continued contributions to the Journal.

Sincerely,
Professor EIC JCQ
Editor in Chief, Journal of Clinical Question

Comments to the Author
This topic has certain clinical value. The literature searched is relatively complete, and there are no obvious formatting issues in the paper writing. The content is substantial, and the results section is supported by charts, with no obvious content that needs to be modified.

Comments to the Author
In the present work, the authors carry out a systematic review and meta-analysis of the effectiveness and safety of embolization of the middle meningeal artery in chronic and subacute subdural hematomas.

The studies include the most important recent trials associated with other works with less statistical power.

I consider that the study is well carried out and that it provides information about the safety of the use of this technique in the non-surgical management of this pathology, leaving open the importance of conducting more studies to write protocols and understand other limitations of this technique.
